C U Service Centers announces plans to move their Yukon Branch

Yukon, OK – The Credit Union Service Centers of Oklahoma announced plans today to move its Yukon service center to a new location effective November 1st. The new service center will be located at 1300 West Vandament, across Garth Brooks Boulevard from its current site.

The new branch will feature an all new décor, enhanced security features, and improved access and parking. The staff will remain the same but be better equipped to serve their members.

“The previous location served us well for over 10 years,” said Misty Babb, Branch Manager. “We wanted to offer drive in services which the new location will allow us to provide. We hope this move will be an easy transition for credit union members and they enjoy the new look and feel of a complete re-design of our branch.”

The new branch will have 4 teller windows for member convenience. The window design includes new bandit resistant barriers for increased member and employee safety, while offering improved communication and visual detail over typical past installations. The branch manager will have a lobby office to help serve members with specific needs or privacy requirements.

“Member convenience and service issues for all age groups and lifestyles were considered, and several ideas were included in the final design,” said Babb. “We will also be open on Sundays from 1 pm to 5 pm for those members who cannot come by during the week.”

The décor will use soft greens, blues and yellows to brighten the interior and improve visibility for our membership. The branch is set to open November 1st. Grand opening celebrations will be held at a later date.

--- End ---
